

ANMOL MADHAV

Data Analyst · Machine Learning · Python · SQL · LangChain · Power BI
anmolmadhav2004@gmail.com · 9084609780 · [LinkedIn](#) · [GitHub](#) · Chandausi, Uttar Pradesh

EXPERIENCE

Data Analyst Intern — Practo Technologies Pvt. Ltd.

Jun 2024 – Jul 2024

- Examined heart and demographic data spanning 300+ patient records to identify behavioral and clinical risk factors associated with heart disease
- Processed and visualized patient health metrics using Python (Pandas, NumPy, Matplotlib, Seaborn), producing 10+ statistical charts for clinical review
- Uncovered correlations between lifestyle factors and cardiac risk scores using statistical hypothesis testing, surfacing 5+ key predictive variables for the care team

Tech stacks used: Jupyter · Python · NumPy · Pandas · Matplotlib · Seaborn

PROJECTS

Wealth Assistant — AI-Powered Financial Data Query System [↗ Repo](#)

Jan 2026 – Mar 2026

- Assembled a LangChain and Gemini AI assistant enabling voice and text queries across MySQL and MongoDB, automating financial insight generation for 2 database types
- Developed a LangChain-based SQL/NoSQL query router that auto-classifies user requests and retrieves data across 2 database backends in under 3 seconds without manual query writing
- Integrated voice input and frontend session memory to render 5+ AI-generated financial insight types and graphs directly from natural language queries

Tech: FastAPI · LangChain · LangGraph · Google Generative AI · MySQL · MongoDB · QuickChart.io · Web Speech API

Autism Prediction — Machine Learning Classifier [↗ Repo](#)

Feb 2025 – Mar 2025

- Trained a Scikit-learn classification model achieving 78% accuracy in detecting Autism Spectrum Disorder from behavioral assessment data
- Shipped the prediction model as both a Streamlit web app and a command-line tool, enabling 2 independent access paths for end users
- Engineered the preprocessing pipeline using label encoding and Pickle serialization, cutting model load time by 60% for repeated inference runs

Tech: Python · Flask · NumPy · Pandas · Scikit-Learn · Pickle

Crypto Market Trends Analysis — Power BI Dashboard [↗ Repo](#)

Dec 2024

- Tracked cryptocurrency price trends over 10+ assets with Power BI and DAX, surfacing volatility patterns for trading decisions
- Designed an interactive dashboard with KPIs, slicers, and custom charts, reducing manual reporting time by consolidating 3 data views into one interface
- Calculated DAX-based metrics — percentage change, moving averages, and period-over-period comparisons — to track 5+ key crypto performance indicators

Tech: Power BI Desktop · DAX · Microsoft Excel · Power Query Editor · Data Visualization Tools

SKILLS

Languages: Python, Java, SQL, Kotlin

ML / AI: LangChain, LangGraph, Google Generative AI, Scikit-learn, Pickle, Pandas, NumPy

Data & Viz: Power BI, DAX, Tableau, Microsoft Excel, Power Query, Matplotlib, Seaborn, Data Visualization

Frameworks & Tools: FastAPI, Flask, Streamlit, MySQL, MongoDB, Android Studio, Jupyter

Concepts: Data Structures & Algorithms, Statistical Analysis, Machine Learning, Data Analysis, Responsive App Design

CERTIFICATIONS

Generative AI — IIT Roorkee

Oct 2024

Machine Learning — IIT Roorkee

Sep 2024

Complete Machine Learning and Data Science — GeeksforGeeks

Jul 2024

ACHIEVEMENTS

- Named to the Dean's List for academic performance, ranking in the top 5% of the semester cohort
- Ranked among the top 10% of students in the 2026 graduating batch

EDUCATION

B.Tech — Computer Science and Engineering

Aug 2022 – Present

Lovely Professional University

Jalandhar, Punjab
